Thomson-Price Wedding

On Monday morning, at the home of Mrs. John Albert Price, her second daughter Gladys was married to Mr. John Watson Inglis Thomson, of Corbin, B. C., Rev. A. E. Larke officiating. Mendelssohn's Wedding March was played by Miss Margaret McDonald, the ceremony being attended by the family and immediate friends.

The bride, who was given away by her brother, Earl, wore a gown of peach applique silk net with large hat of eggshell shade and shoes to match, and carried a beautiful bouquet of tea roses.

Following the wedding breakfast they left by motor for a short honeymoon trip to Calgary. They will reside in Corbin, where Mr. Thomson is on the office staff of Corbin Coals Ltd. The young couple are well known in Coleman, the bride having been on the public schools staff for a number of years, and Mr. Thomson was formerly with the International Co.

Many friends showered them with rice and confetti as they left on their honeymoon, and extended them congratulations.

United Church

The Sacrament of the Lord's Supper will be administered next Sunday morning at 11 a.m. Every member and adherent is invited to join in this service of worship.

The young people will go mountain climbing on Monday, July 13, and will leave by cars from the church at 7 a.m. Sentinel mountain will be climbed. Each person will provide his own lunch. If you have a car bring it along.

Rod and Gun Club

The first competition of the season will be held on Sunday, July 12, at the Waldron ranch.

Members intending to go should hand in their names and the fee of 50c by Friday night, so that the committee may arrange for transportation.

Cars will leave the town hall at 6 a.m. sharp. The committee is A. Phillips, sr., and E. W. Beart, secretary.

Miss Dora Burrows is home from teaching school at Rochester, Alta.

Steve Leosky's Meat Market

(Formerly Burns & Co. Ltd.)

is always at your service for supplying the highest grade government-inspected meats, smoked goods, etc.

Fish and Poultry in season of the highest quality.

Coal Industry Should Set Example to Consumers Before Squealing

(Drumheller Mail)

Dramatic announcement that the Insull interests of Winnipeg had purchased 42,000 tons of Virginia coal thus depriving Canadian miners of 20,000 working days in order to affect a saving of \$25,000, brought protests from all sections of Alberta. For the sake of the miners and the industry as a whole we regret that the patriotic feelings of Insull officials have to be subordinated when bargains in alien fuel are announced, but cannot sympathize with those of the coal operators who themselves practice, in a small way, what the Insull company does on a large scale.

Is the coal industry prepared to buy Canadian machinery and equipment at higher prices for patriotic motives? Do mine officials take advantage of their business connections with wholesale houses to purchase domestic supplies to the detriment of retailers? It is relatively easy to be patriotic when one has something to sell. "Canadian Coal for Canadians" may bring tears to the eyes of Canadian consumers who take such things as seriously, but our contention is that patriotism demands a certain amount of sacrifice from those who seek to make capital out of the slogan.

We are compelled to generalize on this subject. We admit that there is the odd exception, but the coal industry must first make sure that it has a legitimate right to equal at the action of Insull before it makes further demands on the government.

Result of Check-Weigh Vote

The balloting for check-weighmen at International and McGillivray mines resulted in the election of Wm. Haysom by 83 to 60, against George Gaseoff, and Wm Carr by 106 to 30, against Pete Popeniuk. For secretary of McGillivray check-weigh fund George Dickson was re-elected, against Wm. Graham, the vote being 70 to 66.

John Cox, formerly of the International mine, wrote The Journal on June 25 from London, Eng., stating he intended going to Berlin and Frankfurt for a visit.

Marooned

Buck Eysacker, Lewis Brown, Harold Nelson and his little brother, Leslie, went by car to camp four miles east of the forest ranger's cabin on the Carbondale river, and northeast of Coleman 22 miles. They went in on July 1, and did not report to the forest ranger till a day or more later. They were unpleasantly surprised on being informed that, after they had pitched their camp, the bridge over which they went in had been taken out to be replaced by a new one, and would not be ready for a week. As they had only sufficient food for a brief stay, it was decided that Harold Nelson would walk through the mountains to Coleman, and he came out on Friday, covering 18 miles in 53 hours. His lunch was a piece of dry bread and a drink from a mountain stream.

With his father, he went back on Saturday, "packing" out the required grub to stand off the pangs of hunger of the marooned party, who had, however, been fortunate in catching fish sufficient to allay anxiety.

As the editor of The Journal was eager to enjoy the experience of walking over the divide into the south country, he accompanied the relief party, and was glad to see the end of the 22-mile trail at about 8 p.m. Saturday evening. On the way out Lynn (or Lynk) creek had to be crossed about seven times, and the last crossing was over the deepest hole, by means of a long log thrown across. Into this hole Walter Nelson, loaded with his pack, made a most graceful plunge, after trying to do the balancing trick, soaking bread, blankets and the rest of his pack, besides getting an unlooked-for bath by total immersion. On climbing the bank, he remarked that something exciting is bound to happen on a trip of that nature.

However, a blazing camp fire, fried trout and plenty of bread and butter and tea soon made the trials of the long hike fade away, and the party retired to rest happy and contented, although somewhat stiff in the joints.

About 3 a.m. rain pattered heavily on the tent, dispelling hopes for an early start at fishing, so everyone went to sleep again, though it was getting colder. About 5:30 a.m. there seemed to be a deadly calm, and on one the party taking a look through the tent door, was surprised to see several inches of snow. Fishing was therefore off for at least half a day, so those who had to work next day decided to tighten their belts and walk back to "civilization."

Walter Nelson, Lewis Brown and "ye ed" walked back by the Webb Creek trail which crosses the divide and leads to Passberg and Hillcrest, which is a much shorter route to the railroad than by coming out via Lynn Creek and York Creek route to Coleman. Here a taxi was brought into service to complete the journey to Coleman, which was a welcome haven after the long week-end hike.

Jim Hadley and Archie McCulloch resigned from the hospital board, and Dave Holley of the International and John Porton of McGillivray were appointed to the board. It is reported they resigned as a protest against a change in the constitutional policy of the board which they would not vote for.

Football Game Postponed Till Monday

Hillcrest football club telephoned last evening just before the time scheduled for the game with Coleman that they were unable to come, but that the game would be played on Monday evening at 6 p.m. if satisfactory to Coleman. The local executive were sorry to disappoint the patrons here, and state that tags purchased will be good for Monday's game.

Baseball

On Friday last the home baseball team went to Macleod to try and wipe out the defeat they received at the hands of Bellevue on July 1, and succeeded by a score of 11 to 6. They got away to a bad start in the first two innings, Macleod leading 5 to 0. But when the boys hit their slugging stride it was all up with Macleod. In the third Coleman scored three runs, in the fifth four and in the ninth four.

A return game was played in Coleman on July 5, the home team taking that also by 7 to 6. It was a good game. The visitors secured an early lead of 3 to 0, but failed to hold it against the heavy hitting of Coleman. A very large crowd turned out to see the prairie boys perform and aided the home team by their cheering. The final score was 7 to 6.

On Monday the team went to Macleod, and were smothered to the tune of 16 to 4. They hope to even matters when Michel plays the return game in Coleman.

Coleman's line up: Kapelke, pitcher; Richards, catcher; Joyce, Pattinson, Atkinson, Haysom, Fraser, Jenkins, Lilya, Emmerson.

Has Appointment in Calgary

Mr. J. R. Roberts, who since his arrival from Wales early this year has been directing the glee club, and established a class in music and singing, has been appointed director of the choir at First Baptist church, Calgary. With Mrs. Roberts and his son Elgar, he will shortly remove to Calgary, but will visit Coleman one day in each week. The leadership of the glee club will be discussed at a meeting this week.

ST. ALBAN'S CHURCH

Sunday, July 12 is the sixth after Trinity. Sunday school at 9:30 a.m.; Holy communion and sermon 11 a.m.; Orange lodge church parade and service 2:30 p.m.

The crusaders of the Church Army will spend a week in the parishes of Blairmore and Coleman, from July 20 to 26. It is likely that a service will be held at the Boy Scout camp at Lee Lake on July 20, in addition to the regular campaign meetings. Captain Bewley and Captain Casey are in charge.

The annual congregational picnic of Blairmore and Coleman will be held at Lee Lake on Wednesday afternoon, July 15. Convenors of committees will report on arrangements for transportation, sports and refreshments, by Sat. July 11.

Angelo Gentile drove a party to Calgary at the week-end, including Miss Margaret Robinson and F. G. Graham, and there returned with them Pettit Robinson, Margaret's brother, and Miss Dorothy Smith, who will act as assistant in the post-office while the staff are on holidays.

Carnival at Blairmore

Opening to-night for three nights the carnival will have two home-made booths, blankets, wicker chairs, tables, bridge and boudoir lamps, "cat alley," and special prize each night of 50-piece dinner set, in addition to the grand prize of a Chevrolet car. Refreshments and dance pavilion will be in full swing. The committee look for a big crowd.

Local News

Mr. and Mrs. Gamble returned on Monday from two weeks holidays spent at Vancouver and Seattle.

Miss Grace MacKinnon is spending the summer vacation with her parents, having recently returned from Guelph, Ont.

Mr. and Mrs. John Watson of Fan 98 left on Monday morning to spend two weeks holidays in Calgary.

Mrs. Fred Cox's father, H. McColl, of Parkburg, Sask., is visiting here this week. Mr. and Mrs. Cox motored to Parkburg and he returned with them.

The suggestion has been made by a well known bachelor gentleman that the names of summer holiday widowers be recorded weekly, and stars placed against their names for each week of good conduct. All so that a copy of The Journal be forwarded weekly to each wife. The first week it would probably be safe to credit them with a star, but after that, well—who knows? Grace widowers include Sidney Short, whose wife is in Vancouver; Maurice Cooke, F. G. Creggan and a few others who are too bashful to permit their names to appear, but keep your eyes on them!

Local News

Mrs. E. R. Kennedy of Cranbrook is visiting her parents, Mr. and Mrs. E. W. Beart.

Mrs. R. M. Dunlop is holidaying in Vancouver, journeying there by car with the Macleans of Bellevue.

Mrs. M. W. Cooke and children, and Mrs. Craggan and little daughter left on Monday by train to spend a holiday in Vancouver.

Mr. and Mrs. Harry Cady, Miss Cady, sr., and Florence and Dennis motored to Spokane to spend two weeks holidays.

Miss Mae Bell and Margaret went to Calgary exhibition on Wednesday and will visit Miss Peggy Fairfull for a few days. Miss Ethel Wilson accompanied them, and will spend a few days with friends in the city.

W. H. Elliott, M.L.A. in the Ontario legislature for Fort Frances, and proprietor of the Fort Frances Times, is a visitor with Mr. and Mrs. A. E. Guerdard. He was the guest of honor at a dinner in the Coleman hotel on Monday evening, to which a number of friends were invited. Chas. W. McKinnon and H. T. Halliwell were called on to speak a few words of welcome to the guest of the evening, in which thanks were tendered the host and hostess for their generous hospitality. Mr. Elliott expressed his pleasure in visiting his old friends.

from the last time he was in the Fort Frances, at whose bedside he was always welcomed, and for the kind expressions of the gathering. Mr. Guerdard replied on behalf of himself and Mrs. Guerdard. The evening was then given over to playing bridge, a most enjoyable gathering terminating shortly before midnight.

Creation Of Currency Equal To Production To Cure World Depression

Montreal.—Creation of currency equal to the value of production is needed to cure world-wide depression, declared Miss Agnes MacPhail, member of parliament for South Grey, at a banquet Saturday night which concluded the Canadian Federation of Business and Professional Women's second annual convention.

Miss MacPhail quoted John F. Sinclair, New York economist, in support of her views. Mr. Sinclair, she recalled, had predicted the present depression five years ago. He had said recently, he saw no hope unless the governments of the world would create currency sufficient to absorb the goods produced.

Increase in the production of goods has been at the rate of three per cent annually for a long period, and in the United States, at about four per cent, Miss MacPhail noted. But currency had not increased as rapidly as goods and there had not been paid out sufficient in wages and salaries to buy the goods produced, largely for lack of what Miss MacPhail termed "a democratic monetary policy."

The amount of currency, she continued, was measured by the gold "locked up in vaults somewhere."

"The principal factor in the world wide situation is that we have not had enough intelligence to create currency to the amount of goods to be moved," she declared. "If we declared war tomorrow—which I pray God we won't—we'd be off the gold standard immediately, because our monetary system would not carry us through a crisis. And we're in a crisis now." Money was in too few hands. The rich man, she charged, had more money than power of consumption and the poor man had power of consumption but not the currency to satisfy it.

Great Britain was "as near to being excited as she ever gets" over the coming disarmament conference, Miss MacPhail said, yet the Dominion House of Commons had been in session for four months and no one had mentioned the conference except herself and J. S. Woodsworth, Labor member for Winnipeg North Centre.

When there were 20,000,000 men in the world out of work, even the possibility of death did not appeal them, and this constituted a war danger, she continued. In the army they were assured food, clothing and shelter.

Air Mail Postage Increased

Rate Will Be Six Cents For First Once Instead Of Five

Moos Jaw, Sask.—Postal rates on airmail letters will also be affected by the increased rate of postage, according to wire notices received here by local postal authorities. An increase of one cent on all letters carried by air mail in Canada becomes effective immediately. The rate will now be six cents for the first ounce instead of five cents as formerly.

The increase will likely be in the form of a one-cent war revenue stamp. It is understood. The prime minister hoped to add \$200,000 to the postal revenue in this manner.

MacNider Praises Herridge

Ottawa, Ont.—Back from a ten-day visit to Washington, Col. The Hon. Handford MacNider, United States minister to Canada, Monday, June 29, spoke in glowing terms of the impression made by Major W. D. Herridge, Canada's new minister to the United States. "Everybody was tremendously impressed with Major Herridge," Col. MacNider declared.

Palestine's population has just been estimated at 900,000.

Production Of Wheat During The Coming Year Will Show Big Decrease

Kansas City, Mo.—Arthur M. Hyde, secretary of agriculture, said in an interview here, that, in his judgment, the world-wide production of wheat during the coming year would be at least 330,000,000 bushels short of last season.

This, he said, included Russian wheat and took into account the probability that Canada, at most, would have only 225 million bushels this year, that Argentina, just being, would be 30 per cent short in wheat acreage, and that Australia

Postage on Newspapers

Increased Rates Expected To Yield About \$200,000 A Year

Ottawa, Ont.—Increased postage rates against newspapers with a circulation in excess of 10,000 copies an issue will add about \$200,000 a year, Premier R. B. Bennett told the House of Commons. The bill increasing the rate on papers with that circulation, other than religious, scientific or agricultural, has passed. The rate was increased from one to one and a half cents.

During the discussion, Hon. Peter J. Veniot, former postmaster-general, said the newspapers, because of the increase, would "find the new rate will cost them so much they will adopt a cheaper means of circulating their newspapers."

Premier Bennett said the newspapers "have been fair about the thing. When it was brought to their attention, they expressed a desire to co-operate with the government in arriving at a reasonable rate, realizing that the cost of transporting such papers involved a loss."

Leads In Disarmament

Britain Has Now Gone The Limit Says Premier MacDonald

London, England.—"We have gone pretty nearly to the limit of the example," said Prime Minister J. Ramsay MacDonald a trifle wearily in the House of Commons, as he took up the navy, and air services, comparing the British figures with those of the other great powers.

"The naval appropriations of other countries have increased in much the same proportion as ours has decreased," observed the prime minister, speaking on the navy.

As he closed his disquieting comparisons Mr. MacDonald pleaded: "I would appeal to the other nations interested in peace and disarmament to admit that one nation cannot by its own example bring about disarmament—that it is the duty of every one to join together and make further disarmament possible by international agreement."

Radio Policy

Quebec May Appeal To Privy Council On Question

Ottawa, Ont.—The finding of the majority of the Supreme Court of Canada in favor of exclusive jurisdiction of radio was gratifying to Hon. Alfred Durneau, Minister of Marine, whose department has charge of radio.

"We did not think it advisable to outline a policy on radio broadcasting until we got the decision as to jurisdiction," said the minister. "It now rests with Premier Taschereau whether he will appeal to the privy council. If Quebec does not appeal we will take up the question as soon as the time limit for making an appeal has expired."

Homestead Entries Filed

Many Land Seekers On Hand When Office Opened

Edmonton, Sask.—Homestead filing was again thrown open in Alberta when the new provincial regulations became effective July 2.

Land seekers lined the corridors of the Edmonton offices and comparatively brisk opening hours have been reported from the Peace River and Grande Prairie offices. No lands are being made available for the present in the Calgary and Lethbridge districts.

Five Killed In Plane Crash

Opening Of Air Pageant At Hamilton Marked With Tragedy

Hamilton, Ont.—Five persons were crushed to death, in a Travelair monoplane here when the pilot, attempting to swerve to avoid a crowded field, lost control of his machine as the fabric on the left wing ripped and sent the plane flying over on its back.

The dead: Captain Robert Sterling, of Montreal, pilot of the plane.

Harold Raine, general superintendent of the Canadian Press, Toronto.

J. H. Maher, Jr., owner of the plane.

Charles L. Daly, Jr., Toronto parachute jumper.

Alfred Rogers, of Hamilton, Ont.

The plane had just participated in a "rat chase" over the city in an effort to draw a crowd to the airport, where the pageant was to have been held. The pilot averted downward, but on account of the crowded field, apparently changed his mind and attempted to zoom back up, but the fabric of the machine was ripped from the left wing, and the plane crashed about 150 feet to the ground.

The plane was a mass of debris and broken parts were scattered for yards around. All except Rogers remained dead when taken from the wreckage, and he died in an ambulance en route to the hospital.

What was to have been a brilliant opening of a trans-Canada air tour to help make Canada more "air-minded" was marked by tragedy.

The plane that crashed was one of a numerous fleet that was to have travelled to the Pacific Coast and back after a two-day air carnival at Hamilton. Captain Sterling would have piloted it throughout the tour.

Canada's Sea Limit Fixed

Jurisdiction Of Customs Changed From Twelve Miles To Three

Ottawa, Ont.—A decision which sets aside that section of the Customs act giving Canadian revenue officers power to seize Canadian craft within the 12-mile limit was handed down by the supreme court of Canada in the action of Dunphy versus Croft.

The appeal was argued on behalf of the plaintiff, Captain Sylvester Dunphy, of North Sydney, by D. A. Cameron, K.C. The decision is a far reaching one in that it restricts the jurisdiction of customs officers to the three-mile limit or territory within Canadian coastal waters.

British Team For Canada

Riflemen From Old Country To Enter Competition At Ottawa

London, England.—Commander Sir Lionel Fletcher, R.N.R., retired, has been appointed captain of the British team which under the auspices of the National Rifle Association, has accepted the invitation of the Dominion of Canada Rifle Association to shoot in matches in Ottawa under Koller and Mackinnon conditions as known at Biele. The team will leave England by the Cunarder Assam on July 24, arriving in Montreal on August 2, and will arrive home again, travelling in S.S. Aurania, by about August 29.

Ottawa, Ont.—Sufficient members of the permanent force will remain at Camp Hughes to conduct the various instructional classes, Hon. D. M. Sutherland, Minister of National Defence, has stated. The rest of the artillery and the Princess Patricia's are being brought back to Winnipeg since it was thought better to have the troops stationed in that city.

\$100,000,000 GOES UP IN SMOKE

This picture was taken when the fire which destroyed part of the famous harbour of Saint John, N.B., was at its height. The scene, looking south, shows some of the piers burning rapidly while ships are being towed away from the fire zone. Before the tragic conflagration had burned itself out more than \$100,000,000 worth of damage had been done.

HEADS MEDICAL MEN

Dr. Alex. Primrose, of Toronto, who was chosen resident-elect of the Canadian Medical Association for 1932 at a meeting of the Council at Vancouver recently.

Complete Epochal World Flight

Post and Gatty Circle Globe In Less Than Nine Days

Roosevelt Field, L.I.—Wiley Post and Harold Gatty completed a flight around the world at 7:47 1/2 (E.S.T.) July 1st, marking the 16,000-mile journey in less than nine days with 13 intermediate stops.

At 7:44 p.m., the white ship "Winie Mae" shot at terrific speed out of salmon-coloured sunset and a crowd of approximately 2,000 broke into wild cheers.

Post, the one-eyed pilot, who had done all the flying on the journey around the world, shot his swift plane over the crowd, banked deeply and made three leisurely circles of the field, selecting the best possible place for the landing.

Gatty and Post completed the world flight in eight days, 15 hours and 51 minutes. Their actual flying time in the air was only four days, ten hours and eight minutes.

As soon as the plane stopped rolling, Gatty and Post climbed from the cabins, turned their plane over to a police guard, and carried an automobile which carried them a mile across the field to the administration building.

As they left the automobile, friends and admirers of the flyers grabbed them up and carried them the last stage on their shoulders as flashlights boomed in the falling darkness. Suddenly the police lines gave way and the field became a bedlam with a momentary rush, breaking out as police, with night sticks in their hands, attempted to force a way for the flyers.

Princess Pats To Return

Ottawa, Ont.—Sufficient members of the permanent force will remain at Camp Hughes to conduct the various instructional classes, Hon. D. M. Sutherland, Minister of National Defence, has stated. The rest of the artillery and the Princess Patricia's are being brought back to Winnipeg since it was thought better to have the troops stationed in that city.

Farmer-Owned Elevators Operated By Company Is Plan Of Bracken

New Taxation Now Operative

Stamps On All Cheques and Increased Postal Rate Started July 1

Ottawa, Ont.—A number of the taxation features incorporated in the Budget, brought down by Rt. Hon. R. B. Bennett in his capacity of Minister of Finance at the beginning of the present month, came into operation on July 1. Of these the one that has most widespread effect is the increase in postal rates.

Penny postage disappeared except only in respect of drop letters—that is, letters delivered in the same town as that in which they are mailed. An additional cent was imposed in the budget on "out-of-town" letters, so that henceforth the minimum rate for three, on and after July 1, will be three cents.

The stamp tax of two cents on all cheques, irrespective of their value, became effective also on Dominion Day. Previously the tax applied only to cheques issued for upwards of \$10.

Provisions of the income tax amendments, with the sole exception of that relating to the two per cent payable by Canadian corporations to non-resident shareholders, became operative July 1.

Shipments Of Frozen Fruit Are Increasing

New Process For Packing Adopted By Vancouver Island Fruit Growers

Victoria, B.C.—Frozen strawberries and other small fruits will be shipped from Vancouver Island to the United Kingdom in steadily increasing quantities, following the adoption of a new process for packing, according to Captain F. Livezey, manager of the Saanich Fruit Growers' Association, who expects that the plan will absorb a large part of the berry surplus this year.

A company has been capitalized at \$75,000, most of the stockholders being berry growers. The new company is expected to handle at least 30 tons of strawberries and logberries this season, and will seek to establish a market in London, England, where samples recently forwarded attracted much attention.

Postage Stamps On Cheques

May Be Used Instead Of The Excise Stamp

Ottawa, Ont.—Postage stamps may be used for the two cent tax on cheques and money orders, Premier R. B. Bennett announced in the House of Commons. In opposition to the tax, which went into effect July 1, Hon. Fernand Rinfret, former secretary of state, declared one of the nuisances in connection with it was that a special excise stamp had to be used and these were frequently not easy to obtain outside banking hours. The prime minister then told the members of the House that a change had been made from the method of collection a few years ago, and postage stamps might be used.

Joan Of Arc Memorial

Rouen, France.—Lady Douglas Haig has just presented to Monsignor de la Villere, archbishop of Rouen, primate of Normandy, a purse of \$2,000 collected among English people to help towards the memorial chapel to Joan of Arc, to be erected on the market place of this city.

May Hold Conference Of Powers To Discuss War Debt Adjustments

London, England.—The British Government intervened dramatically in discussions of President Hoover's moratorium plan by announcing its "willingness" to hold a conference of the powers chiefly concerned if the negotiations at Paris should break down.

The Associated Press learned that Great Britain has advised France that the French proposal regarding the Hoover plan would be an entire alteration of the Young plan in regard to the question of guarantees, and it is understood the proposals are unacceptable to Great Britain.

Winnipeg.—Operation of farmer-owned elevators—in Manitoba, Saskatchewan and Alberta by a company to operate the grain handling plants as a line under a management acceptable to the agrarian organizations and the governments is a possibility, according to Premier John Bracken. He believed such a scheme might obtain the financial backing of the Dominion government as well as the provincial administrations.

The Manitoba premier outlined the plan when addressing members of Manitoba Pool Elevators Limited, here. He said such joint operation would provide for uniform management, permit joint sale of the crops, reduce operating costs, and would probably simplify financing.

"If such a scheme could be worked out the government of Manitoba would consider it advisable to be parties to it," said Mr. Bracken. "While the advantage of co-operative action would be obtained, such a plan would be worked out on the basis that each province would stand on its own feet and be responsible only for its own crop."

"Such a proposal is now under consideration. If it becomes a reality it is planned to appoint a joint general manager, acceptable alike to the three governments and the elevator associations."

Winnipeg.—Plans for re-organization of Manitoba Pool Elevators Limited, subsidiary of the Wheat Pool, were outlined here by Premier John Bracken.

Financial assistance, and re-organization of the central board of directors, of which Colin H. Burnell is chairman, to include government representatives, are paramount in the plans put before 200 representatives from local pool elevator associations. They represent the 11,000 members of the co-operative.

The scheme for rehabilitation of the elevator system will now be discussed by the local associations who must agree to all the terms proposed, including that stock in Manitoba Pool Elevators Limited must be held by the government and the local associations.

Mr. Bracken declared it was the desire of his government for the farmers to continue operation of their elevator system, rather than to operate a government line, lease or sell to private individuals.

"This government will do nothing to hamper or discourage the development of co-operative grain marketing," he said. "The governments of Saskatchewan and Alberta, along with Manitoba, will not stand idly aside and see the farm grain marketing organization disappear from western Canada. The spirit of co-operation is not dead and will not die."

Japs Held By Mounties

Vancouver, B.C.—What is said to be the first move by Royal Canadian Mounted Police to uncover a number of Japanese who are allegedly illegally in Canada was taken with the arrest of Seroku Kojima, of Glacier, and Tokuro Tanaka, 39, Lulu Island, Japanese school teacher, on conspiracy charges.

Doukhobor House Burned

Nelson, B.C.—Fire completely destroyed one of the two communal houses comprising the Doukhobor village of "Mount Zion," at Brilliant. Unlike most of the villages built by the community, which are of brick, this was of frame construction. Each village can house 100 souls.

Poor Fishing at Week End

The week end was unfavorable for fishing parties. Those who went out Saturday night for the week-end awakened early Sunday morning to find the ground covered with a few inches of snow. Though the weather showed signs of clearing, it remained cool and showery throughout the day, so that fishing was given up as a bad job by most of the parties. Bellevue club had planned a trip to the North Fork, but it was abandoned. The truck with the refreshments went out the night previously, but no cars left on Sunday morning. Tom Holstead took a party to the North Fork Saturday evening, but they returned on Sunday without any fish.

NOTES AND COMMENTS

Holiday season is in full swing. Some are taking holidays which are compulsory, wishing for work. And some are enjoying the holidays which school vacation brings, whilst others are glad to get a week or two or even a few days.

No matter if you own a car or not, there is one advantage of living in the mountains. You will not travel as far on foot as by auto, nevertheless you may enjoy the scenic attractions of the beaten path which can only be seen by taking the bridle path or forest trail. And it will develop more stamina and muscle, and a good healthy appetite, than by riding on upholstered seats over dusty highways. Your speed may be slow, but what does that matter if you are on a holiday?

Rotary Clubs met at Waterton Lakes Park on July 4 and another resolution was given birth. It is proposed to unite Waterton and Glacier parks as an international peace park. The idea is good, but as the proposed territory is at present an international park, though lacking the name, then it should not cost anything more than a few thousand words and a resolution to make it into a peace park, where international harmony may even soften the harshness of the winds which sweep across there equally as fiercely as through the Crows Nest Pass, and southern Alberta.

When a number of people gather, they must do something to justify their existence. Accordingly they orate and they "resolute" and finally draft something which is sent to someone at Ottawa or Washington to furnish a little more "food for thought." Of course, if it were not for those energetic gentlemen who think up the ideas and get them endorsed by the rank and file there would be stagnation. So originators of resolutions have a useful place in the round of human events. Any bonehead can second a resolution.

Summer is the time of open windows, noises from loud-speakers, mosquitoes and flies. You may screen windows and doors to keep out insects, but you cannot control the entrance of hideous sounds from radio sets around you. What some like others dislike, with the result that people often suffer in silence from a medley of sound resembling a Kaffir dance around a chuck wagon. Static often helps to quell the noise,—or increase it.

As a rule people wish for more things than they have ability to earn the money to pay for. This is one of the prime causes of people, living on regular incomes, running into debt. High pressure selling methods whereby you pay a few dollars down and the balance is spread over a year, help very nicely in building up debts. No fault could be found if there was sufficient income to pay for these things as well as meet the current expenses of the day, such as the grocer's and butcher's bills. But when these bills are stalled off to meet instalments on luxury purchases, then it is not playing square with the merchants who supply the daily necessities. The old sign in a pool room, quite commonly seen, might be applied—"If you can't pay, don't play."

Use it while you pay for it is very enticing, but the trouble is that many things purchased on this plan do not help the purchaser to increase his income. They rather tend to put him in reverse. A washing machine may pay for itself, but for every useful thing you may list, you may count many that are in the luxury class.

Wisdom, however, comes with the years, and when you have acquired sufficient to enable you to live a methodical life with a minimum of worry, it is time to shuffle off this mortal coil. Life for most people is a battle, to meet as cheerfully as possible.

Deaths from automobile accidents continue to increase. They will keep on increasing as long as any person, regardless of being sane, insane, responsible or irresponsible, is permitted to drive a car. The wonder is there are not more.

'Tis hard to judge a man by the clothes he wears, and also it is hard to judge a man by what he writes and says. One of the most brilliant humorous writers recently ended his life, because he viewed life as one horrible joke. Judged by his writing he was the happiest man on earth. Reality proved that unhappiness became so unbearable, that he preferred to take a plunge into the unknown.

The well-known poem, "The Village Blacksmith," says—"He looks the whole world in the face, and owes not any man." Any man who can do that has cause to be happy. Village blacksmiths belong to a past age, when debt was considered a crime.

COLEMAN

ALBERTA

No man has ever won the Indianapolis Race twice in succession, but this is the twelfth consecutive year it has been won on Firestone Tires. The winners chose Hi-Speed tires because of their

Extra Strength—the Firestone Gum-Dipping process gives 25 to 40% extra strength and mileage.

Extra Security—the new Double Cord Breaker gives 26% extra protection against punctures and blowouts.

Extra Speed—the Firestone method of Balanced Construction allows the tire to roll smoother and easier and holds it on the road at high speeds.

Buy your set of Hi-Speed tires today. They cost no more than ordinary tires and right now prices are the lowest in history. See your nearest Firestone Dealer.

Cunard Line's Oldest Known Living Passenger Will Make Atlantic Crossing In New Vessel

If she can make the trip, Mrs. Loring W. Bailey, the Cunard line's oldest known living passenger, will make a trans-Atlantic crossing in the new 73,000-ton steamer now being built for the line on the River Clyde, Scotland, the first of a pair of swift mammoth ships that will supply a weekly service between New York and ports on the English Channel, making the voyage in four days.

Mrs. Bailey made her first trip to Canada on the Cunard liner "Cambria" in January, 1848, more than 85 years ago. The "Cambria" was a side-wheeler, carried sails, and made the voyage from Liverpool to Halifax in two weeks, being delayed by rough seas followed by dense fog. Her schedule time was ten days.

Mrs. Bailey, who is now in her 90th year, enjoys excellent health and recalls with remarkable distinctness the happening of a long and varied career. She is especially proud of the fact that she is the oldest living passenger of the Cunard Line, which had its beginning in her beloved Canada, in the old gray city by the sea (Halifax) where Samuel Cunard laid the foundations of the famous Cunard Line of today with a fleet of twenty-four ocean liners, playing between Europe and America.

Born Lauretine Marie d'Avray, Mrs. Bailey was the daughter of the Baron d'Avray, and first saw the light of day on the island of Mauritius, in the Indian Ocean, off the east coast of Africa, was then and still is one of England's sugar bowls and not a small one either.

When Lauretine was five years old her parents took her from her tropical home on a journey which was to end in cold Saint John, New Brunswick, where the Baron had secured a position as Superintendent of Education in the Maritime Provinces. The journey was a long one. The family embarked on a sailing ship bound for Queenstown, sailing around the Cape of Good Hope. It took two and-a-half months to reach the Irish port, their ship passing but one steamer on the entire voyage.

After visiting London and Northern France the d'Avrays set out for Liverpool, where they embarked on the "Cambria" for Canada.

Landing at Halifax in mid-winter, Lauretine saw snow for the first time. She thought it was salt until she tasted it, but could not understand why it was so cold, nor why it quickly melted in her warm fingers.

In travelling from Halifax to Saint John the family passed over the Cobequid Mountains, in Northern Nova Scotia, in a rude covered wagon, which was drawn for more than a hundred miles through the frigid country over glare-ice. Railroads had not yet made their appearance in that part of the country.

The girl's father was very successful in his new post and won promotion until he held the chair of modern languages in King's College, now the University of New Brunswick.

It was while living at the college that Lauretine met and married a young professor who had come from Harvard, Loring Woot Bailey, who afterwards became famous as a scientist, and who was designated as a charter member of the Royal Society of Canada by the Marquis of Lorne. Dr. Bailey's service at the University extended over 47 years.

For many years the Baileys spent their summers at Fredericton. It was here that they celebrated the silver and golden anniversaries of their wedding.

After the death of Dr. Bailey at the age of 86, Mrs. Bailey moved to Halifax, the scene of her first landing in the New World. Here she was a guest aboard the Cunard liner "Aquitania," when that giant ship docked at Halifax on July 4, just 91 years after the first Cunard, the "Britannia," set out from Liverpool, a pioneer in the world of men shipping.

Recently in speaking of the Samuel Cunards, Mrs. Bailey said: "I knew the Cunards when they lived in Chatham. They used to visit

Shiriff Woolhaupter in Fredericton. Mrs. Cunard gave me a small statue, about six finger high, when she left Chatham for England. I still have it."

To Stimulate Livestock Sales

Country-Wide Project To Establish a Market Overseas For Canadian Cattle

A gathering of 120 stockmen at Brandon unanimously favored a country-wide project to establish a market overseas for Canadian livestock and livestock products. The meeting, composed mostly of members of the Manitoba Livestock Pool, supported a plan of direct overseas sales to the powerful Co-Operative Wholesale Society of England, outlined by H. S. Arkell, superintendent of the Canadian Livestock Co-Operative. The proposal is to be placed forward before the six provincial bodies for which the Canadian Co-Operative is the selling agency, namely, Manitoba, Saskatchewan, and Alberta Co-Operatives; Canadian Livestock Producers; United Farmers Co-Operative Co., Ltd. (Ontario); Co-Operative Federes de Quebec; and the Maritime Livestock Board, Inc.

Fox Feeding Guide

Keeping In Step With Season Found To Bring Best Results

Keeping in step with the season is the way to ensure best results in fox feeding, studies in this respect at the Experimental Fox Ranch of the Dominion Department of Agriculture at Summerside, P. E. I., show. The report for 1928, 1929 and 1930 just issued states: "It is absolutely necessary that foxes should be fed in step with the season. When the earth is covered with green vegetation foxes require the least amount of food. In the late fall months when frost has destroyed vegetation and the prey of the foxes is in good condition foxes require a high meat ration. When the prey of the foxes is in poor condition and the vixen and her prey are often snowed in, foxes do not require a large amount of food."

The Wool Crops

Co-Operative Wool Growers Give Summary Of Quality Of This Year's Clip

With much wool from Ontario already graded and cars beginning to arrive from all parts of the country at the various warehouses of the Canadian Co-Operative Wool Growers, officials of that organization are now in a position to make a fair summary of the quality of this year's clip. That from Ontario is strong in staple and bright, while the first of the clip from British Columbia indicates that the present wool is well up to the standard of previous years. Western Range wools are strong and exceedingly well grown but show marked evidence of the recent sand storms.

Milk a Bone Builder

Another Good Reason For The Liberal Use Of Milk

Scientific research finds another good reason for the liberal use of milk, especially in the diet of the growing child, and that is in its capacity as a bone builder. The human body contains more calcium than it does any other mineral, and the best and cheapest source of supply is milk. Dietetic experts assert that a quart of milk daily ensures the growing child of the best storage of calcium for the manufacture of bones and teeth. It is equivalent in calcium content to 10 large oranges, 10 large helpings of cauliflower, 24 helpings of carrot, 32 eggs, or 20 pounds of beef.—Department of Agriculture, Ottawa.

Speeds Ripening Of Tomatoes
The farmer doesn't very often get a chance to fool Jack Frost, especially on a soft crop like tomatoes, but experimental work at Morden, Man., by the Dominion Department of Agriculture shows conclusively that this can be done. With the advance of the season tomatoes ripen more slowly and the use of ethylene gas speeds up the process from late August on. Fruit in danger of frost damage can be picked and quickly ripened by the use of this gas.

The Republic of Andorra, a small country lying between France and Spain, pays its President a yearly salary of \$15.

Tree Planting Plan

The Year Policy For Establishment Of Wind Breaks On Saskatchewan Farms

Inauguration of a Saskatchewan government ten-year tree planting plan for the encouragement of the establishment of wind breaks on the farms throughout Saskatchewan was announced by Hon. J. F. Bryant, Minister of Public Works.

The tree-planting policy, which will be run in conjunction with the tree-planting policy of the federal government through its forestry farms at Indian Head and Sutherland and the various experimental farms operated by the federal government, will include the planting of over 100 acres to caragana seed for the purpose of growing seedlings for distribution among the farmers of the province under a supervision plan.

In addition to the tree-planting policy, the federal and provincial governments are inaugurating a joint grass seed policy whereby seed will be distributed among the farmers with a view to increasing the fibre content in the soil and retaining more moisture.

More Space For Cattle

New Arrangements Made For Shipments From Canada To England

A great deal of additional space has been secured on steamships to which to move cattle from Canada to the United Kingdom. It has been announced by Hon. Robert W. Leslie, Minister of Agriculture. Since the movement of cattle to England started this season the results have been of such a character that many more cattle were available for export than the original space contracted for would take care of.

The new arrangements mean that there will be space to ship over 10,000 head from now until the end of the season. The rate will be unchanged, namely \$15 a head.

Leaves Estate To Poor

Quarter Of A Million Dollars Bequeathed To Destitute Of London, England

Mrs. Mary Pryor, a widow of Kingshorpe, Northamptonshire, England, has left the residue of her estate totalling nearly \$250,000 to help the down-and-out sheltering nightly in the crypt of St. Martin's Church in Trafalgar Square, London, England. This method of assisting the destitute in the heart of London, was instituted in 1824, when Rev. Dick Sheppard, the rector, "curtained cubicles and provided for men and women. The destitute were given cushions to sleep on the benches. Food tickets are also supplied.

British Not Barred

May Come To Canada But Strictly On Their Own

"There is no restriction at all on immigration from Great Britain," Hon. Wesley A. Gordon, Minister of Immigration, told the House of Commons. "The only difference is that we are not actively encouraging movements into Canada. Any Britisher who desires to come to Canada, under his own steam, is free to do so."

With regard to the continent of Europe there had been rigid restrictions imposed.

Germans Invent Boat-Tent

A combination boat-tent has been designed by an inventor in Germany. The boat of light rubberized fabric, is inflated and may be used for paddling over lake or stream or as a bed, the inflated bottom serving as a mattress. Two light wood frames, a telescopic ridgepole and a light waterproof pup tent complete the portable camping outfit.

"Mother, I don't think hens will ever go to heaven."
"Why not, child?"
"They lay eggs on Sunday just as if it were Monday."

Would Increase Value Of Fish Industry

Fish Flour Is New Product Not Yet On Market

From \$500,000 to \$1,000,000 annually may be added to the value of the fisheries industry of the country by the development of "fish flour," Henry O'Malley, Commissioner of the U.S. Bureau of Fisheries says.

Produced from the edible parts remaining from the filleting or packing of fish, the new product is dried and ground into a fine meal with a pleasant taste, odor and fluffy appearance. The new flour is more highly refined than the fish meals used for feeding animals, and in cooking may be easily disguised to make the fish taste unrecognizable, Mr. O'Malley said. At present the flour is not available commercially.

Provided the public takes to the new product, there is a potential production of 20,000,000 pounds of raw material available, it is estimated. Much interest has been shown in the work of developing the flour by national manufacturers and distributors of bakery products and specialized food products.

The bureau has succeeded in making very edible fish flour cookies, mixing the new type with the old-fashioned wheat flour and covering "fishy" tastes with cinnamon or ginger. It is said that the flour can also be used successfully in thickening soups or chowders and in the manufacture of salt crackers. Its use in bread has not yet been tried by the bureau.

Only the surface of the possibilities of developing this new product for human food has been touched, according to J. R. Manning, technologist of the Fisheries Bureau.

A Nation Of Fruit Eaters

Average Per Person In Britain Last Year Was 33 Pounds

British people are rapidly becoming a nation of fruit-eaters, according to the Empire Marketing Board's report on fruit supplies in 1930. "Last year more fruit was eaten in the United Kingdom than in any previous year," states the report, which mentions that the average consumption was 33 pounds for every man and woman and child. This was an increase of 12½ pounds per person over the previous year.

A pleasing feature of the report is the statement that a higher proportion of the fruit imports was supplied by the Empire last year than previously. Nearly 62 per cent of apples, 40 per cent of the bananas and more than half the peaches were Empire-grown.

Revealing Old Secrets

Settlements Of Olden Times Being Discovered By Aviators

Secrets of antiquity that have remained hidden for centuries are today being brought again to the knowledge of men by the aeroplane. In Britain, the Middle West, and other historical regions throughout the Empire an air-borne camera is revealing details of towns, settlements and works of olden times that are assisting archaeologists mightily in their reconstructions of the world as it was fifteen, twenty or more centuries ago.

Keeping Cream Fresh

Studies in keeping cream sweet made by the Dairy and Cold Storage Branch of the Dominion Department of Agriculture, show conclusively that iced water not only keeps cream better than when it is placed in a refrigerator, but that it takes considerably less ice. The reason for this lies in the fact that the iced water, being a better conductor than the cold air of the refrigerator, cools the cream more quickly.

New hose equipment makes it possible to direct a stream of water around a corner, thus helping firemen to reach some fire spots more effectively.

ENGLISH ROWING BELLES COMPETE ON THE CONTINENT

Above are seven members of the rowing crew which will represent Great Britain at Lucerne, Switzerland, at the international rowing regatta. These girls will compete against crews of German, Belgian and Swiss girls in several events.

Plea Is Made For Retention In Canada Of Able Men To Carry On Important Research Work

Keeping Up Vitamin Supply

Diet Of Milk, Meat, Eggs, Vegetables and Fruits Is Very Helpful

Medical science still knows comparatively little about the necessities and supply of vitamins, although it recognizes that they "produce profound changes in growth," Dr. F. P. Tisdall, of Toronto, declared in a scientific session of the Canadian Medical Association at Vancouver. "Everyone in the world seems to know all about vitamins but the medical profession," he remarked. After demonstrating by slides the result of experiments with vitamin diets, he concluded by stating that as a practical application of what is known, a diet of milk, meat, eggs, vegetables and fruits, should go a long way in supplying the essentials to proper nutrition.

Fifty per cent of our diet today is made up of refined flour and sugar, he said, which is lacking in vitamins and almost lacking in proteins. The problem lies in seeing that the deficiency is made up for in the remainder of the diet.

"The deficiency of a vital element cannot be made up by taking an excess of another," he added. Experiments have proved this. It has also been demonstrated that when fed on special foods children had reached greater growth than those fed a "normal" diet.

The difference in the vitality between the Oriental and the Occidental people had been traced by an authority, he said.

At least ten minerals are essential to life, said Dr. Tisdall, but all except three are found in sufficient quantities in our normal diets. The three are calcium, iron and iodine.

Weaning Young Pigs

Natural Weaning Has Been Found To Bring Best Results

Natural weaning gives best results with a litter of young pigs, and to obtain this, feed suitable for young pigs should be provided in the creep. A good mixture for the purpose is a half and half combination of midlings and finely ground oats from which the hulls have been sifted. Young pigs will start to nibble at the feed at about two to four weeks of age, and by the sixth or seventh week should be eating quite freely. Under such a procedure shock incidental to more abrupt methods is overcome and weaning develops as a natural event.—Pamphlet 135 N.S., Department of Agriculture, Ottawa.

Mining In British Columbia

1930 Showed Greater Mineral Production Than Any Previous Year

British Columbia took more ore out of its mines in 1930 than in any previous year, according to the annual report of Hon. W. A. McKenzie, Minister of Mines. Reduced prices in the world's markets cut down value to \$55,391,993 from the 1929 record figure of \$68,254,443, but in comparison with most past years the 1930 total is high. Ten years ago, in 1921, for instance, the mines of the province produced only \$28,000,000. Mining companies in British Columbia last year paid dividends of \$12,527,653, only a slight decrease from the record figure of \$13,642,308 paid in 1929.

Cattle For British Market

Twenty-seven cars of pure bred cattle arrived in Winnipeg from further west the other day en route to the British market over Canadian Pacific rails. This is the seventh shipment of the kind from Western Canadian ranches since last October.

Long distance racing matches for homing pigeons date back to 1818.

Need for a better understanding of the significance of and necessity for research was urged by Dr. H. M. Tury, president of the national research council, Ottawa, Ont., addressing the Canadian Society of Technical Agriculture, in session at Guelph, Ontario. He advocated more co-operation between scientific men.

A plea for the retention in Canada of able men made by Dr. Tury, who deplored the circumstances which led to the best brains leaving the country.

"You can't make a first class country with second class men," he said. "We must hold onto our best brains. We have material out of which to make leaders for every activity to be found in Canada," he stated in an address in which he traced the development of national research movements throughout the world.

Production costs will strike a level that will help to stabilize land values, said Dr. O. C. Stine, president of the American farm economics board, who also spoke. While the next two or three years might mean a great deal of suffering to producing countries, he said, the outlook now is brighter than it was a short time ago.

Growth of the organization during the past year was reported to members by W. T. Macoun of Ottawa, in his presidential address.

Mr. Macoun emphasized the fact that three new branches of the organization had been formed during the year, and reported increased activity in all departments of the society's work. He urged the members to pay more attention to the average man and suggested extension work of the C.S.T.A. be increased in the future.

Egg Consumption Is High

Per Capita Consumption Of Eggs Higher In Canada Than The U.S.

Prof. J. V. Rice of Cornell University recently called attention to the Canadian per capita egg consumption which is shown as 36.8 dozens, whereas that for the United States for the same year is shown as 18.7 dozens. While these figures are for 1925, as the figures from the most recent United States census have not as yet been made available, they show that Canada increased her per capita consumption from 15.1 dozens in 1901 to 36.8 dozens in 1925, and to 39.8 dozens in 1930, whereas that for the United States has hovered around the 16 dozen figure for some 30 or more years.

The editor of a produce journal in the United States comments as follows: "It would seem that the Canadian figures would give a fair answer to the question as to whether or not our increasing production of eggs can be disposed of by increasing consumer demand. No doubt, more careful standardization of quality will have some effect upon consumption but it will take, as well, considerable additional effort to bring our per capita consumption up to the same level as that in Canada."

Not Of Great Price

"You're looking bad, old man," said an acquaintance to Browne. "What's the trouble?"
"Domestic," answered Browne.
"But you always said that your wife was a pearl," remarked the friend.

"So she is," returned Browne sorrowfully. "It's the mother of pearl that's the trouble!"

Butter Exports

Butter exports from the Port of Montreal during this season to date amount to 24,895 boxes or 1,204,150 pounds, as compared with nothing at all at this date last year. A belief prevails that this may be the beginning of a resumption of export trade on a substantial basis.

"You annoy me from morning till night, Minna."
"Impossible, madam. You are not up till mid-day!"—Flegende Blaetter, Munich.

SUNDAY SCHOOL LESSON

JULY 12

THE PREACHING OF THE APOSTLES

Golden Text: "We must obey God rather than man."—Acts 5:29.
Lesson: Acts 3:1 to 4:31; 1 Corinthians 1:21-25.
Devotional Reading: Romans 10:8-15.

Explanations and Comments

The Arrest Of Peter and John. 4:1-4. Priests and Scribes and the captain of the temple were troubled because Peter and John proclaimed the resurrection of Jesus Christ. The captain of the temple was the commander of the temple guard and was himself priest second in rank only to the high priest. The Sadducean party, to which the high priestly caste at that time belonged, did not believe in the doctrine of a resurrection, and, of course, it was especially galling to them to have the apostles teach the people that Jesus had risen from the dead. They arrested the apostles but because it was too late for a trial that day they had them imprisoned for the night. The result of Peter's preaching, Luke now tells us, was that about five thousand men believed in Christ. No wonder, therefore, that they were started when men of Jerusalem who had cried "Crucify Him!" were now convinced that the Crucified was the Risen Saviour.

Peter's Boldness Before the Sanhedrin. 4:8-12. On the morning rulers and scribes, who composed the Sanhedrin, sat in session. The Sanhedrin was the great Jewish tribunal which was supreme in all matters affecting the Jewish law, the sentence of death being the only penalty which they might not impose. Annas and Caiaphas, before whom Jesus had been brought a prisoner, Alexander and other great officials were present. The Sanhedrin sat in a semicircle and the prisoners, Peter and John, stood before them. The man whom Peter had healed was also there, as a kind of accessory to the "good deed."

"By what power, or in what name, have ye done this?" the officials demanded. "An Peter, filled with the Holy Spirit and eager to use the chance thus given him, replied: 'Ye rulers of the people (chief priests and elders [representatives of the Sanhedrin], if this day are examined concerning a good deed done to a poor man, whom ye call Peter, who is the name of Jesus Christ, whom ye crucified, whom ye raised from the dead, even in the name of this man stand ye here now.' Thus Peter answered their question and with superb daring accused them of the crime of having put to death the Lord's Anointed."

"He is the Stone which was set at the corner of the temple, and which was made the Head of the Corner." The stone made the head of the corner is the stone which is set at two walls which supports and unites them. Had the arch been in common use the stone which was set at the two walls which supports and unites them. "For in none other is there salvation, nor grace, nor gift, nor reward, nor name under heaven, the name of Jesus Christ, whom ye crucified, whom ye raised from the dead, even in the name of this man stand ye here now." In the Greek he has an emphatic position at the end of the sentence, as has also "ye" in verse seven. By what name have ye, ye rulers, men, done this? There is no other name wherein we—ye the judges and we the fishermen—must be saved.

"I find a man trying to lift a stone, which is too heavy for his strength; he says 'I can do it,' and he takes the fruit of high, noble, divine, moral, spiritual culture unless he reaches out and lays hold of powers that are not his own, that make for righteousness."

The Apostles Threatened and Dismissed. 4:13-22. The Sanhedrin marvelled at the boldness of Peter and John, who, they perceived, were unlearned and ignorant men; and seeing the fact of the cure now answer the arguments of Peter. "What must we do with these men?" they murmured. Accordingly they decided to threaten the apostles, hoping thus to prevent their speaking to any one in "this Name."

Peter and John were recalled and were charged not to speak nor teach in the name of Jesus. Respectfully and magnificently Peter replied, "Whether it is right in the sight of God to hearken unto you rather than unto God, judge ye; for we cannot but speak the things which we saw and heard."

Demand For Vegetables

The increasing demand for vegetables in the diet is probably largely responsible for the rapid expansion which took place last year in the vegetable canning industry throughout Canada. The increase in 1930 was 64.8 per cent, as compared with 1929. Total production amounted to 10,066,614 cases. Department of Agriculture, Ottawa.

Post Offices In Canada

Canada has 12,427 post offices, an increase of 38 since last year, and of 180 since 1922, was the reply given by Hon. Arthur Saupe, postmaster general, to a question asked in the House of Commons. Rural mail carriers throughout the country number 4,256.

BABY'S OWN SOAP

It's Best for You and Baby too

Recipes For This Week

(By Betty Barclay)

POOR MAN'S PUDDING FRAPPE

1/4 cup rice.
 5 cups milk.
 1/4 cup sugar.
 1/4 teaspoon salt.
 1/4 teaspoon vanilla.
 1 cup whipped cream.
 1/4 cup candied ginger.

Wash the rice well, then mix it with the milk, sugar and salt, pour into a baking pan and place in a very moderate oven, 300 degrees, to bake from two to three hours. Stir frequently for the first hour, then add the vanilla and finish baking without stirring. Chill thoroughly, skim off the crust and fold in the ginger cut in tiny pieces and half the whipped cream. Arrange in sherbet glasses, glasses, topping each with a rosette of whipped cream and a bit of ginger. Chill almost to freezing before serving.

DINNER FUNCH

(Serves 4-6)

Juice of 2 lemons.
 Juice of 1 grapefruit.
 2 cups water.
 Sugar or honey to taste.

Mix thoroughly.
 For Variation: Add to the above mixture 1 cup of the juice of another fruit, such as grape juice, raspberry juice, loganberry juice, pineapple juice, elder or the juice from any canned fruit.
 Or add 1 cup of a puree made by forcing peaches, pears, apricots, bananas or berries through a potato ricer or coarse sieve.

A Popular Service

Growing Demand Is Shown For Government Graded Beef

There could be no better indication of the rapidly growing popularity of the Beef Grading Service of the Dominion Department of Agriculture than the increase of over 70 per cent, in the volume of beef graded for sale throughout Canada between April and May of this year. Only a little over a year in operation the Beef Grading Service graded and branded a total of 1,199,357 pounds of "red" and "blue" brand beef in April last. In May this total raised to 1,983,022 pounds. Of the May total 1,333,247 pounds graded "good" for branding "blue" and 649,775 pounds "choice" for the "red" brand. Figures by provinces show a rapidly increasing demand for government graded beef, particularly in Ontario and Quebec.

Sea Safer Than Land

Statistics Show Sea Made Safer, But Peril To Life On Land Is Increasing

Curious how a legend, especially when it is born and nurtured by fear, survives demonstrated fact. There is the legend of the "Peril Of the Sea," of the danger of the sea. Ships have become bigger and safer, shipwrecks fewer and far between, loss of life at sea quite rare. Yet while the sea is being made safer, and the peril of life on land has been rising from year to year, people remain as unconsciously of one movement as the other. They still regard the sea as a place of peril.

Interesting statistics, bearing on this point, appear in the Shipping World. In 1890-1899, the average annual total losses of British ships were approximately 450 ships or about 375,000 tons, and the average loss of life in British ships was over 1,000 persons per annum. In 1924-1928, the corresponding figures were 175 ships or about 85,000 tons, and the loss of life about 220 persons per annum.

The story of these statistics of course, is the work of wireless, of bigger and better ships, of better weather reports, of a general world movement for promoting safety at sea. On the other hand, while we have been doing these things, cutting down on the toll of the deep, we have been devising machines with a most extraordinary ingenuity to make existence on land a hazard. Yet nobody seems to be overly exercised about the latter.—New York World.

Aid For Blind Needed

Duty Rests On Government Opinion Of F. E. Layton

Not from one charitable organization or the combined facilities of all institutions in the country, but from the state, must come aid for the sightless members of the community, declared F. E. Layton, president and founder of the Canadian Federation of the Blind.

"We have been told that now is not the time to ask governments for pensions. Why not?" Mr. Layton asked. He addressed the fourth conference of the federation at Montreal, welcoming delegates from all sections of Canada, from Halifax to Vancouver.

Young Trees Distributed

From 1901 to 1930 over 116,000,000 young trees have been sent free to over 100,000 applicants living in the Prairie Provinces—Manitoba, Saskatchewan and Alberta—by the Canadian Government. Forest Service of the Department of the Interior. Last year more than 6,000,000 tree seedlings and cuttings were shipped.

That the sun's surface is hotter at the poles than at the equator is a view recently advanced by Prof. Albert Einstein.

Natives of French Morocco prefer movies of the Wild West type.

A modern ocean liner costs about \$30,000,000.

Keep Free From Fat—Feel Younger

Unlike most salts, Kruschen salt is simply a laxative—if that's all you want any kind of salt with any kind of a label will do—but is that all you want?

When you take Kruschen Salts you not only stimulate your bowels, liver and kidneys to function naturally and perfectly, but you supply every internal organ, gland, nerve and fibre in the body with nature's own revitalizing and rejuvenating minerals.

Get a bottle of Kruschen Salts at any drug store—take one-half teaspoon in a glass of hot water every morning before breakfast—cut down on sweets and fat forming foods and get some moderate regular exercise—in just a few days indolence changes to activity and life grows brighter.

A Virginia woman writes: "I just started on my second bottle of Kruschen Salts and have been losing flesh right along—I have fathomed the secret of flesh reduction."

The Northern Seaport

Plans For the Development of the Townsite, Of Churchill

Plans for the development of the townsite of Churchill, seaport of northern Manitoba and terminals of the Hudson Bay Railway, call for the construction of a modern town, with central heating, fireproof public building and semi-fireproof residences, boulevards, parks and squares.

Constructed under a town planning system, approved of by Hon. Donald G. McKenzie, Provincial Minister of Mines and Natural Resources, every facility of a modern town will be provided. The townsite will be ready for settlement next year. No property will be sold, but it will be disposed of in 50-year leases, subject to revision every five years.

Churchill will be blessed with wide streets for thorough traffic, protected residential districts and generous space for recreation. All streets, parks and squares will be named after early explorers and heroes of Canadian history.

Good Poultry Record

Performance Of B.C. University Rhode Island Reds Is Attracting Attention

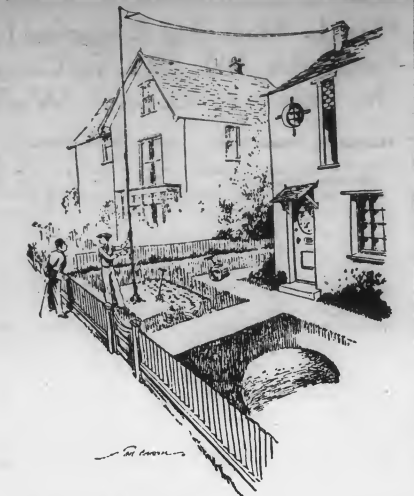

Professor E. A. Lloyd, head of the poultry department of the University of British Columbia, states that the members of the University's family of Rhode Island Reds have already averaged over 100 eggs in their second year and give promise of exceeding an average of 200 before the fall. Such production has never been achieved by any strain or breed anywhere in the world, he said. There are eight birds in the family.

Glady's—After I'd sung my encore I heard a gentleman from one of the papers call "Fine! Fine!"

Harry—Goodness! And did you have to pay it?

Hugo Grotius, the great Dutch scholar of his day, had a good law practice at 17 and was attorney-general at 24.

Japan now has 37,000,000 postal savings depositors.

"Good soil for growing things?"
 "Quite good. This was one of last year's hollyhocks."—The Pasturing show, London, England.

WORLD HAPPENINGS BRIEFLY TOLD

The will of Dr. Horace A. Bashore, a dentist of York, Pennsylvania, provides that all bills due him for dental work be cancelled.

During 1930 Canadians spent \$200,000,000 on alcoholic beverages and \$50,000,000 on cigarettes—more than the annual premiums on the entire amount of life insurance in Canada.

Alfred Aloysius "Trader" Horn, co-author of the book "Trader Horn," died in a hospital at Whitstable, England, after a brief illness. He was 78 years old.

The Vimy Ridge War Memorial will not be ready for unveiling before 1934 or 1935. Hon. D. M. Sutherland, Minister of National Defence, told the House of Commons.

Without any discussion a bill authorizing a loan of \$300,000 to the harbour commissioners of New Westminster, B.C., was given the first reading in the House of Commons.

Gerald Egerton Williams, 29, who was shot down while flying over the German lines on the morning of Armistice Day, died at Bournemouth, England, of injuries sustained in an auto accident.

Mahatma Gandhi has been designated by the government to represent the Indian Nationalists on the federal structure committee of the second round table conference, which meets in London, England, September 5.

Recently appointed to the Manitoba and western Ontario command, Royal Canadian Mounted Police, superintendent Richard Field arrived at Winnipeg from Dawson, Y.T. He succeeds Supt. A. B. Allard, who was transferred to the Yukon post.

Glad, fifteen and a half miles southwest of Nelson, across the Kootenay River, and a flag station on the Canadian Pacific Railway on the Nelson-Rossland Branch, may become the new home of the Sons of Freedom, if efforts now being put forward by the province meet with success.

German Steel For Russia

The German Iron and Steel Trust has agreed to deliver to Russia 80,000 tons of bar iron, the same amount of sheet iron and 40,000 tons of steel products in the next two months at unstated prices. The deal was arranged in Berlin by the Russian trade delegation which recently came from Moscow.

Young Mattison has a loud-speaker in his room, and one evening he goes but leaving it on.

Mistress: "I hear sounds in Master Mattison's room. Go and see whom he has in there."

Maids (returning): "There is only the radio there. It is talking to itself."—Kasper, Stockholm.

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but

allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

CUT DOWN
 YOUR LOSSES
 BY INSTALLING
 WINDOLITE

USE
 WINDOLITE
 IN
 BROODER
 HOUSES
 LAYING PENS
 DAIRY BARN
 SUNROOMS
 ETC.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

CHAPTER XXII.

Keep her in bed," said Dr. Bennett, as he joined Simon upon the porch. "She's had a terrible shock, but she's strong for all she's so slender; and we must save that baby. I'll drop in again this afternoon, and in the meantime, I'm not so sure as you think you can keep her mind off this horrible possibility, but give her all the encouragement you can. Tell her about cases you've heard of where boats supposed to have been lost were picked up weeks afterward. Put your imagination to work and invent such stories if you can't remember any! She's got pluck, and grit, and everything on her side; but a broken heart isn't the fairy tale that cynics would have us believe. Mr. Bartlett, and Nick is just about the breath of life to that little girl."

The doctor's eyes were moist. He blew his nose vigorously, and added: "what's being done?"

Simon cleared his throat.

"I'm too confounded dazed to really know; but Mr. Halliday's doing everything they is to do. He's sent a message to a friend of his who's cruising somewhere off Florida in a big steam yacht—says if no word comes from the 'Sea Bird,' he'll hire it and hunt 'em himself—says it's likely they may have landed on one of them islands, and if the storm put their radio out of order they couldn't do nothing but wait till they were picked up, that is if their boat was injured. The big liners don't go nowhere near some of them places, and they might stay there months. Gosh! It's got to be powerful tough on Gay—waitin'."

"It will be tough on all of us," said the doctor, "but a thousand times worse for her. Mr. Halliday will have the comfort of doing something. It's a bad business, Mr. Bartlett, it's a bad business, I wish to God the boy had stayed at home."

Bad news travels fast. Before noon everyone in Bakersville knew the worst. John Maxwell, who had glanced but briefly at his paper that morning, heard the news on reaching the bank, and without a word to anyone, returned to Mary for comfort. It seemed to her that he had aged five years in the short half hour since he left her.

"It was I who sent him," he kept repeating. "It was I who sent him. If it hadn't been for me..."

"That's a morbid way to look at it, John," she answered. "We all sent him. Gay as well as the rest of us who had his interests at heart."

She left his side and went to the window, looking out at the glory of her blossoming garden. The sight hurt her, remembering how Nick had played there with her own children so long ago. At last she turned.

"I'm going to stay here," she said gently. "And you must go back to work, John. Of course everything possible will be done to find them. Julie telephoned me just before you came. She said Mr. Halliday was already planning to start for Florida, where he will make every effort to locate them if—if—"

Mary stopped abruptly, and going to her husband, kissed his bowed head.

"Johnny you mustn't feel this way. Gay would be the last one to blame you. I know. The thing we must do is to help her live in every way we can. She fainted when she saw the news in

the paper, and is in bed. Julie didn't know what the doctor said; but at least, we can care for the little boys until she takes up again. I'll go down at once."

"I'll take you down in the car," said John Maxwell, rising. He felt suddenly better at the thought of doing something, as Mary had known he would. "There's nothing in the world I wouldn't do for Gay; yet we can't make her forget this terrible day," he added sadly. "She will never forget it, however it may end."

It was in silence that they rode to the house on Elm Street.

"You go on up," said Simon to Mary Maxwell. "Maybe another woman's what she needs. She's not cried. God a'mighty! I wish she would! I been settin' there tellin' her a pack o' about how they ain't no doubt but what Nick's safe and sound; but I got a hunch she knows I'm lyin'. I ain't much of a hand at monkeyin' with the truth."

"All she did was to lay there and say till my heart's been back! Yes, Uncle Sim, of course he'll get back all right. I'm not goin' to get worked up because of the baby. It's the little daughter Nick wanted, and maybe she'll be here when he gets back. Think how happy he'll be! No. I'm not worryin', Uncle Sim. Gosh! I got a hunch there's a minute longer an' not made a baby o' myself."

Tears were furrowing their way down his wrinkled cheeks. John Maxwell wiped his own eyes, and said: "You mustn't get me to crying, too, if I'm to help Gay. I'll take the boys home, Mr. Bartlett, if it will make things easier."

A long hour passed before Mary came back to the two men waiting anxiously below. She sat down in the big rocker, and drew a deep breath.

"Well," she said, in answer to their pleading eyes, "she cried, and I think it will help her. She's drowsy now, worn out with emotion, and I hope she'll sleep. She wants me to bring the boys back tonight—says she can't spare them. I didn't tell her any lies, but I think I gave her a bit of courage, though the dear child has a good stock of her own. And John" (Mary's voice trembled at last), "the first thing she said was to tell you not to blame yourself for sending Nick away. She spoke of it more than once, and said that as soon as she was older she wanted to see you. There's that. If there's anything we can do, Mr. Bartlett, day or night, just call us. I'll go along home now and take the babies. It's just as well that they shouldn't be with Gay today. They'd try to keep up before them, and there's a limit to human strength and endurance, you know."

"I feel like I'd most reached the end of mine," confessed the elder, looking pitifully old in the bright morning sunlight. "But when I think of that plucky little girl upstairs, and Sonny," he broke off suddenly, as the little boy appeared around a corner, "here's Mr. Maxwell come to take you an' Nick on a holiday. You dun wash yer hands like a good boy?"

"Can little Marfa go too?" asked Sonny. "Not to be discontinued." Officials of the post office department denied reports that the Regina-Saskatoon-Edmonton branch of the western air mail route was to be disbanded after July 15. It was pointed out that this story, similar to one some time ago saying all the mail services were to be disbanded, was apparently based on the cancelling of the present air mail contracts in order to give the government an opportunity to review the situation. These contracts terminate at different dates, it was explained.

see that he's worried. When does Mr. Halliday start?"

"To-morrow, I believe. His friends were a good way off, but they put back as soon as they got his wireless, and a message came today saying the yacht would be ready when he got there. The poor fellow looks awfully worse than Gay; yet according to Julie Nipps his is anything but a happy marriage."

"That makes it worse, of course," said Mary understandingly. "Perhaps he has things to regret, Johnny, while Gay has never had a thought away from Nick, nor he from her. Whatever comes, there's a chance that comfort when they lose their best beloved."

It was the first of June, and like all Junes in Bakersville, the weather was hot, and gave promise of hotter days to come. Uncle Sim lounged vaguely for the cooler air of his own State Line. He would have packed up Gay's entire household and taken them with him gladly, but he knew that was impossible, and for that reason he stoically faced the thought of a Bakersville summer. But his brave attempts at cheer were sometimes pitiful, and once Gay remonstrated.

"Uncle Sim dear, don't try so hard to pretend there's nothing wrong. We won't talk about it, and we must keep the children happy; but we needn't believe before each other, need we? Besides, there—there is a chance that Mr. Halliday will find them. You believe that, don't you, Uncle Sim?" (To Be Continued.)

Tinned Hams From Denmark

Danish Methods of Marketing Sets Mark That Is Hard To Beat

There is food for thought for the Canadian farmer in the recent arrival in the Canadian market of "tinned hams" from Denmark. When it comes to marketing its production, or over-production if you prefer, the little kingdom of Denmark sets a pace which is hard to beat. Not only do they market their product in all the usual forms, maintaining the dominant position in the British market, but they are now processing their finest cuts, packaging them attractively, and making a strong bid for the larger consuming centers in our own Canadian market. Canadian farmers should find an incentive to opportunity in the study of the fundamental principles underlying Danish methods might hold much of useful interest.

Suit Made In Record Time

Shear Sheep and Finish Suit In Three Hours and 22 Minutes

In response to a challenge made by Sir Malcolm Campbell in a speech before the Bradford Rotary Club recently, a Yorkshire manufacturing firm and a Leeds tailoring firm have broken the time record in producing a suit of clothes.

Starting with the shearing of a sheep the suit was finished in three hours and 22 minutes. The previous record set in the United States in 1896 was six hours and five minutes. The suit was made to fit Rt. Hon. J. H. Thomas, secretary for the Dominion, who agreed to wear it at the Imperial Industries Fair, at Bradford, next month and later at the Imperial Economic Conference.

Report Is Denied

Regina-Saskatoon Edmonton Air Mail Not To Be Discontinued

Officials of the post office department denied reports that the Regina-Saskatoon-Edmonton branch of the western air mail route was to be disbanded after July 15. It was pointed out that this story, similar to one some time ago saying all the mail services were to be disbanded, was apparently based on the cancelling of the present air mail contracts in order to give the government an opportunity to review the situation. Don't worry about the weather. There will be lots more.

CORNS Lift off - No Pain / QUICK RELIEF

Just a drop or two of Putnam's on any sore corn and out comes the pain. The corn shrivels up and drops off. No scar, no pain, no pinching from tight shoes. You can dance or walk in comfort. Use only Putnam's Corn Extractor. Satisfaction guaranteed. Sold by druggists everywhere.

A Good Fish Story

The season's best fish story comes from Banff Springs, Alberta. A 20-pound trout in Lake Minnewanka, yanked an angler off a pier into the water, but the fisherman held on and with the aid of a police officer and a boat finally landed the prize.

Zaro Agba, the ancient Turk, applied commented on the occasion of his first plane ride that he hadn't been so excited in the last 130 years.

HEADACHES

Needless pains like headaches are quickly relieved by Aspirin tablets as millions of people know. And to matter how suddenly a headache may come upon you, you can always be prepared. Carry your pet tin of Aspirin tablets with you. Keep the largest size at home. Read the proven directions for pain, headache, neuralgia, etc.

Made in Canada

British Admiralty Gives Credit To London

Invention Of R. H. Davis Saves Lives Of Men Trapped In Submarine

Six men who escaped from the sunken submarine "Posidon" apparently owe their lives to the invention of London, R. H. Davis, who provided them with what is described in effect as a "third lung" resembling a lifebelt with a gas mask attached. It was designed to enable men trapped in a submarine to breathe freely until they had a chance to escape.

"It is twelve months since the apparatus was first served out as part of the equipment of submarine crews," Gorman Davis, the inventor's son, said. "It consists of a breathing bag carried on a man's chest and a buoyancy apparatus. To the bag is attached a cylinder of oxygen and the man inhales and exhales air which is being continually purified in the bag. With one of these bags it is possible for a man to live an appreciable time under water. Goggles are used to protect the eyes."

"If there is life aboard a submarine after she is sunk it is possible with this apparatus to escape to the surface no matter how deep the vessel may be."

"Pressure in one chamber must be raised—usually by flooding—until it equals that outside the ship. Then latches may be opened and the men escape. Should they be injured or too weak to help themselves much, the apparatus is sufficiently buoyant to carry them safely to the surface and keep them afloat. Should there be other men alive in the "Posidon" there still seems a chance that with this escape apparatus they may get free."

The Admiralty confirmed the fact that six men escaped by means of the Davis apparatus.

THE RHYMING OPTIMIST

By Aline Michaelis

MUSIC AND MEMORY

The music weaves its vague enchantment here.

Within the dimness of the lofty room.

Till once again I hear the lark's notes, clear

And high across June meadows

I see the white clouds drift and wide

The arabesques of shadow fleetly pass

With restless fingertips the sunlight

Among the thrusting emerald blades of grass.

Now memory and music intertwine;

Though summer and the lark feed long ago.

Again loved notes, in these bright dreams of mine,

Go lifting up from flute and piccolo

How strange, these wandering players have the key

To rooms I thought belonged alone to me!

Use Miller's Worm Powders and the battle against worms is won. These powders correct the morbid conditions of the stomach which nourish worms and these destructive parasites cannot exist after they come in contact with the medicine. The worms are speedily evacuated with other refuse from the bowels. Soundness is imparted to the organs and health of the child steadily improves.

Aeroplane Prospecting

Areas in Northern Saskatchewan Will Be Investigated

The aeroplane will be employed by Professor J. B. Mawdsley of the University of Saskatchewan in locating and charting mineral resources in Northern Saskatchewan. Areas which would otherwise be accessible only with much difficulty can be readily reached by the aeroplane route. Investigation of areas of schist and greenstones presenting favourable prospects for metallic minerals will be made.

Under instructions from the Provincial Department of Railways, Labour and Industries a survey of coal and clay deposits lying north of the Saskatchewan River is also being conducted by Professor W. G. Worcester of the Ceramics Department of the University of Saskatchewan and Walter Hastings, developing engineer. For some time these deposits have been known to exist, but they have never been thoroughly investigated as to their extent, quality or commercial value.

The survey is being made with a view to developing this area if tests prove that development would be feasible.

Health Of Children Affected

Children Of Unemployed Men In Montreal Show Effect Of Malnutrition

The effect of the economic depression on the children of unemployed men has been revealed by the health service of financial federation, conducted by the Child Welfare Association of Montreal. Ninety per cent of the children, who are being examined at the rate of 200 a week, are underweight, Miss Esther Beth, R.N., director of the Child Welfare Association, stated.

One child was found to weigh 24 pounds less than normal. Lack of nutritious food has also caused dental decay and clinics conducted by the association are busy doing what they can to halt the rot. A youngster of 13 had to have her entire upper row of teeth extracted, Miss Beth said.

Deportation Question

British Government Has No New Information On Subject Of Deportation From Canada

Rt. Hon. J. H. Thomas, secretary for the Dominion, was asked in the British House of Commons whether he had received any reply to the representations he said the British Government would make to the Canadian Government regarding deportation of six from Canada of British subjects who had become public charges in the Dominion, either because of unemployment or because they were suffering from disease.

The minister replied he was not yet in a position to add anything to his answer of April 21, when he had told the House the government was taking steps to get in touch with the Canadian authorities.

Have Completed Survey

Survey Made Of Proposed Making Out-Of In Manitoba

Engineers of the Canadian National Railways have completed a survey of the proposed Making out-of in Manitoba, and have made a report to the minister of railways and canals, Sir Henry Thornton, president of the National road, told a special parliamentary committee dealing with railway finances. Hon. R. J. Manion, the minister, said he had not seen the report, nor was he aware of its recommendations, because it had been received by his department only a short time ago.

Operated On Himself

Interné At Philadelphia Successfully Removed One Of His Tonsils

An interné at Philadelphia, Pa., attempted to contribute to scientific fields by removing his own tonsils. It has just been disclosed, Dr. Charles T. Meacham, of Petersburg, Va., a graduate of the University of Pennsylvania a year ago, succeeded in removing one of the tonsils and almost had the other one out when he became ill. Mirrors, a disc on his forehead and one on the wall, were used.

Muscular Rheumatism Subdued—When one is a sufferer from muscular rheumatism he cannot do better than to have the rapid rubbing with Dr. Thomas' Electric Oil. Let the rubbing be brisk and continue until ease is secured. There is more virtue in a bottle of it than can be fully estimated.

The interrogation point was designed from the shape of the human ear. It is quite futile to ask questions unless we lend an attentive ear to the answer.

Phosphorus under water is practically indetectable.

Little Helps For This Week

"Whoever will be great among you, shall be your minister; and whosoever of you will be the chiefest, shall be servant of all. For when the Son of Man came not to be ministered unto, but to minister."—Mark x. 43-45.

What time we nurse our discontent Rather instead should we recall How once in servant's guise He went, Who was Master of us all! Nor any work, whereby was wrought The Father's will, too trifles thought. None any be acquitted. Whose heart this memory incense? Who follows where the Lord hath led, What matter is it where He goes? For working with Him, side by side, The meaneast task is glorified.

Mary Bradley.
We cannot be too little to be like Him, nor so great as to work outside of Him."—Adeline D. T. Whitney.

Terrorists Are Sentenced

Malta Terrorists In Italy Face Sentence Totalling 15 Centuries

One hundred and fourteen notorious Mafia terrorists face sentences totalling 15 centuries as a result of their conviction at a trial in Italy lasting almost a year.

Thirteen of the defendants got life, 16 got sentences of 15 to 25 years, 16 will be imprisoned ten to 15 years, and 69 will go to jail for one year. Fifty-seven others were acquitted.

The charges against the prisoners included 43 murders, 26 attempted murders, and many cases of assault, extortion, bribery, shooting, robbery and larceny.

Persian Balm promotes daintiness, charm and beauty. Magical in its effect on the skin. There is nothing like it for creating and preserving a lovely complexion. Cooling, caring, it soothes and relieves all roughness caused by weather conditions. Delicately fragrant, it enhances the most finished appearance. Makes the skin rose-leaf in texture. Truly a priceless toilet requisite for every discerning woman.

Saskatchewan Cattle Shipments

One hundred head of Saskatchewan cattle went forward to the British markets the other day, 30 of which were "taken from a feed lot within half a mile of Saskatoon. This is the first of several weekly shipments that will be made by the Saskatchewan Co-Operative Livestock Producers Limited.

Took Pinkham's Medicines

"I was always tired and I had severe pain at my periods. Lydia E. Pinkham's Vegetable Compound helped me. I took it before my two children were born and I am taking it now at the change. I have also used Lydia E. Pinkham's Sanative Wash and found it a great relief from inflammation and for a discharge which bothered me."—Mrs. Caroline Dorsey, 196 Head St., Sarnia, Ontario.

Personal and Local

If you want a good laugh, see "Charley's Aunt," a world-famed comedy, at Palace theatre.

Mr. and Mrs. Geo. Kellock and family were visitors to the Stampede at Calgary.

Miss Emily Greenhalgh is home on holidays, after teaching school for the past year.

Miss Van Sacks of the hospital staff is on holidays, and Miss Kilgannon is acting as relief nurse.

D. A. McLeod, dentist, is off duty this week, having undergone an operation. He is making good recovery and hopes to be around again shortly.

Miss Mae Moores is expected home on Saturday for three weeks holiday from Calgary general hospital, where she is completing her third year of training.

A touring bus of the Gray line stopped over night in Blairmore on Friday. The party was the first of the Burlington tours from Chicago via Northern Pacific and Great Northern railroads to Glacier and Waterton Lakes parks, thence to Greenhill hotel, Blairmore, for night stop; then via Crows Nest Pass to Radium for overnight stop, and finishing the auto tour at Banff, whence the return to Chicago is made by train. The schedule will continue weekly during July and August.

Miss May Powell, B.A., graduate of the University of Alberta, was appointed to the high school staff at a meeting held on Tuesday evening. The vacancy on the public schools staff has not been filled, and is still under consideration.

J. D. S. Barrett, several years ago editor of The Journal, renewed acquaintances in town on Tuesday. He was motoring through with his brother, A. L. Barrett, publisher of The Western Star, of Curling, Newfoundland, and Hogan Sour, of Forestburg, Alta., on a trip to Vancouver. Mr. Barrett recently sold his business at Forestburg. His young son, Roland, was with the party.

Miss Olive Hulme, of Oxford, Eng., in writing to The Journal office sends her kindest regards to all who were so kind to her during the time she was teaching in the Pass schools. Many will remember her as one of the exchange teachers from Great Britain. Last year she made a sudden dash to Canada to spend a week in the Pass. Many old acquaintances will doubtless be pleased to hear of her.

Corrie Celli returned from Templeton high school, Vancouver, on Monday. He was met at Creston by his father, and they made a trip by car to Spokane, Mr. A. M. Morrison accompanying them. At this city they met Mrs. Morrison and daughter Ruth, who was returning from school in Victoria. The Morrisons returned from Spokane in the car in which they made the quick trip to Vancouver several weeks ago, arriving in Coleman at 2 a. m. Monday.

The interior of the post-office was formerly used as a billboard for all kinds of notices by those desiring to advertise without cost to themselves. This is prohibited by the post-office regulations. Now the outside of the building is being plastered with bills and scraps of paper. This will not be allowed and hereafter notices or bills will be removed, states F. G. Graham, postmaster. Another evil is the use of telephone or light company poles. When employees climb these poles they often have their hands jabbed or clothing caught on tacks or nails hammered in by bill posters, despite it being against the rules to use these poles.

The Sisters of Providence of the Lacombe Home, Midnapore, were visiting the Pass towns this week on their annual mission, and were accorded a good response, for which they expressed their appreciation. The Lacombe home, named after the famous western missionary, cares for the aged and infirm of both sexes, and also young children, regardless of denomination, and the charitable and unselfish devotion of the Sisters of Providence commends it to public support.

OUR business is growing through giving our customers Goodyear quality in the lowest to the highest priced tire. Here's our big five: The Goodyear-built Progress Tire; the Goodyear All-Weather High Pressure Tire; the Goodyear All-Weather Balloon; and the Goodyear Heavy Duty. We can give immediate delivery on your size. Or we'll put them right on your wheels without extra charge. And don't forget that now is the time to buy—for tire prices have never been lower.
